# Manual: Import ITO Token to MetaMask

Step 1: Open Token Import

Click on the three vertical dots in the MetaMask home screen. Then select "Import Tokens" from the dropdown menu.

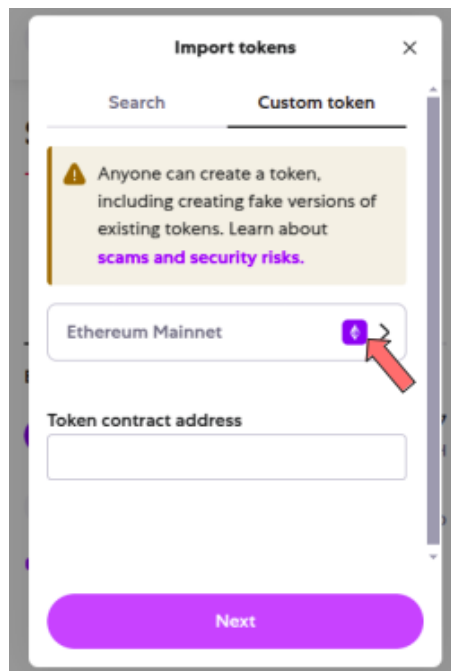

Step 2: Select Token Type

In the import screen, choose the option 'Custom Token' to manually input token details.
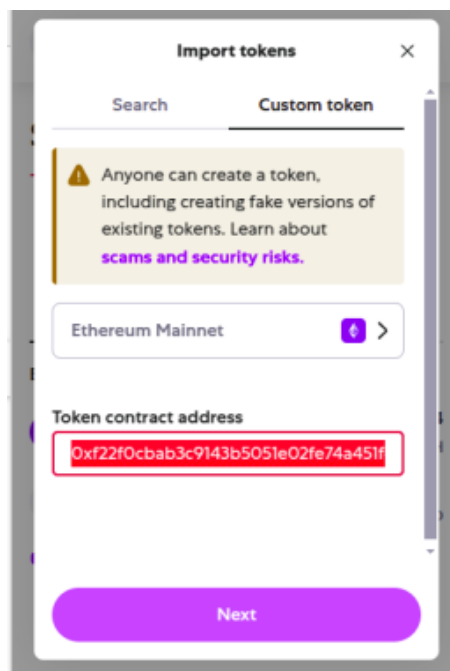

Step 3: Choose Network

Ensure that the selected network is set to 'Ethereum Mainnet'. You can check this at the top of MetaMask interface.

Step 4: Enter Token Details

Paste the following Token Contract Address into the form:

0xf22f0cbab3c9143b5051e02fe74a451fe10e1a13

MetaMask should automatically fill in the Token Symbol and Decimal values. Confirm and click 'Add Custom Token', then 'Import Tokens'.
